

General AGGUSA Photo Policy

No videos or photos are to be taken by **non-credentialed** persons at any and all AGGUSA Events. This is to protect the integrity of the routines and their choreography, as well as the identities of the participants. Teams are welcome to select a single **designated photographer** prior to the start of an AGGUSA event, who would receive accreditation for that event. This single club representative has to be registered on KSIS under MEDIA as the designated photographer before the registration deadline of each event. The designated photographer would be allowed to photograph or videotape the team which they are associated with, but **not** other teams. If a designated photographer is caught photographing other teams in any fashion, they would be removed from the event.

Coaches and club owners will be allowed to record and take photos of their own athletes during the competition for learning/training purposes. We also encourage parents to take photos before/after the competition. Please note that all routines will be videotaped and saved to our files, which will be available upon request.

AGGUSA appreciates your understanding in this matter and apologizes for any inconvenience caused by our policy. Our goal is to protect all members of the sport while respecting the need for creating memories.
